The Genetically Modified Food labeling act is an initiative to mandate the labeling of foods that are either Genetically Engineered or made with Genetically Engineered ingredients. The labeling must be done in a way that a regular consumer can see and read clearly. Consumers currently have the right to know what ingredients are in their food so those with allergies can avoid certain ingredients. This initiative gives Arizona citizens the ability to avoid Genetically Engineered ingredients if they choose.

AN INITIATIVE MEASURE

AMENDING TITLE 36, CHAPTER 8, SECTIONS 36-901, 36-906, 36-973 ARIZONA
REVISED STATUTES; AMENDING TITLE 36, CHAPTER 8, ARIZONA REVISED
STATUTES, BY ADDING ARTICLE 6;

TEXT OF PROPOSED AMENDMENT

Be it enacted by the people of the state of Arizona:

Section 1. Title.

This act may be cited as the "Arizona right to know act"

Sec. 2. Findings.

The People of the State of Arizona find and declare the following:

- A. Labeling of genetically modified food is intended to provide Arizona consumers with their opportunity to make informed choices about the foods they consume.
- B. People with certain religious, cultural and moral beliefs object to consuming genetically modified foods because of objections to the tampering with the genetic makeup of life forms and the rapid introduction and proliferation of genetically engineered organisms.
- C. U.S. federal law does not currently provide for the regulation of the safety and labeling of genetically modified foods.
- D. The long term health, safety and environmental consequences of growing and consuming genetically modified foods and animals which have been fed genetically modified foods have not been adequately tested using independent researchers and laboratories to assure the safety of people consuming genetically modified foods.
- E. Consumers in the European Union, Japan, Australia, Russia, Malaysia, South Korea and even China have the right to know if their food contains genetically modified organisms. This initiative extends the same rights to the citizens of Arizona.
- F. When polled, consumers overwhelmingly favor knowing whether the food they consume is produced with genetic engineering. This initiative brings Arizona statutes into agreement with the desires of the people of Arizona.
- G. The FDA currently regulates the labeling of food in CFR Title 21 with many requirements for both nutrients and potential toxic substances. This initiative only adds one more item to the already existing labeling requirements and shouldn't create any significant burden on food producers and manufacturers.
